

JANITORIAL CARTS AND MOPPING SYSTEMS

MOPPING TROLLEYS

MOPPING TECHNOLOGY WITH A UNIQUE DESIGN

General features of our system

- Twin buckets ensure far less cross-contamination with cleaner water remaining cleaner longer, resulting in more of your areas being mopped with cleaner water.
- Wringers can accept both flat mops and string mops.
- Trolleys come with a handy storage caddy and the red (dirty) smaller bucket is lighter and easier to remove.

Specific features of our system

TM 2815 and TM 2815 WB

- The clean water in the front bucket is transferred to the back bucket during the wringing out process for excellent separation of the dirty water.
- TM 2815 WB has a large tray and handy waste collection bucket with lid.

DM 2416

- An ergonomic winner! Step on the pedal and wring out your mop.
- Wring out the mop and the dirty water flows sideways into the easily removable red bucket.

Divided Bucket

- Comes with a locking handle for easy carrying.
- The wringer can be set in upper or lower position for floor mopping or finish work.

SERVOCLEAN CARTS

COMBI TECHNOLOGY WITH A UNIQUE DESIGN

System features

- All carts come complete with a removable vinyl bag.
- All carts come with a structural foam base, corner bumpers, removable/washable trays and non-marking ball bearing castors.
- A checklist of duties to be done can be mounted under the lid.
- Zippered vinyl waste bag allows for easy waste removal without lifting.
- The bag lid and rear tray fold-up for easy storage.
- The carts come ready to pop up in seconds, no tools required.
- The CCAT-5 has large, all-terrain wheels.

NCT-5 specific features

- We have incorporated true dirty water separation through twin buckets: wring out the mop and the dirty water flows sideways into the easily removable red bucket.
- Red (dirty) bucket is smaller capacity (4 U.S. Gal/16 Litre) and positioned to one side of the wringer. Facilitates the emptying process with less weight.
- An ergonomic winner! Step on the pedal and wring out your mop
