

You asked for it!

Before developing the DuraLux, we talked to end users, equipment decision makers and distributors to find out what they needed most in a commercial machine.

And Sanitaire delivered!

From our dual motors for ultimate versatility on all types of floors, to our high filtration HEPA system, to our exclusive features make this cleaner easy to maintain and easy to use. And like all Sanitaire models, every DuraLux is manufactured to give you the utmost in durability and service.

Exclusive extra-large clog-free intake picks up paper clips, toothpicks and other traditional "cloggers" with ease. That's because the DuraLux air path is not only shorter and more direct, it's nearly twice as big as the typical narrow, spiral wound hoses found on most other commercial vacuums.

Durable chromed steel brush roll with multi-ribbed, poly V-belt pulley provides continuous non-slip operation.

Convenient, quick-change power cord for instant, on-site maintenance and multiple cord length options.

Quick, drop-in design simplifies dust bag changes to save time, mess and aggravation.

Exclusive patented telescopic metal wand with permanently attached retractable dust brush provides a versatile solution to clean baseboards and other hard-to-reach places without the frustration of missing attachments.

Unique extra-low profile folds down to 6" clearance to get under furniture and other low fixtures.
