

CYLINDRICAL BRUSH SCRUBBERS

DP 340 AND DP 420

Clean virtually any floor surface. Not only carpets, hardwood, and profiled ceramics but grouted tile, rubberized floors – including uneven floors – are no issue for the Duplex.

Simply fill the solution tanks and squeeze the trigger to feed cleaning solution on to the twin counter-rotating brushes that scrub the surface with an aggressive action. Twin conveyors lift the dirt-filled solution from the brushes to a central recovery tank or you can choose to double scrub the area picking up the water later. The brushes and drive unit are offset, so they work right to the edge of the machine and into difficult areas.

Brush options include 2 grades of black brushes for regular or aggressive scrubbing, grey is the standard all-purpose brush and yellow is for sensitive carpet areas

WEIGHT	48 lbs.	57 lbs.	84 lbs.

CYLINDRICAL BRUSH SCRUBBERS

TTQ 1535

The scrubber for all reasons. The Tynex gritted brushes handle even the toughest jobs but it's a quick change to softer nylon brushes when the situation demands it. It's ideal for cleaning grouted tile with pick up in forward or reverse.

The pump feeds the cleaning solution to the brushes for a consistent flow of water and the easy to reach on / off water switch allows for double scrubbing.

The large rear wheels allow for easy transport while its compact size makes it excellent in confined areas.

The adjustable handle is ergonomic and comfortable to use and folds over taking up minimal space during storage or transport.
