DIRECTIONS FOR USE:
JEWEL has been specially formulated with a unique polymer blend for exceptional toughness and durability. This lower maintenance finish displays superior scratch and scuff resistance significantly reducing the frequency of restoration and recoating operations. JEWEL has been developed to meet today's demand for performance with excellent responsiveness to both burnishing or spray buffing operation.

For best results, apply a minimum of two coats of JEWEL to a previously sealed with FIRST REFLECTION OR DIAMOND SEAL. Always apply JEWEL to a floor sealed with FIRST REFLECTIONS or DIAMOND SEAL. With a clean, rayon/cotton blend mop, apply JEWEL by first "framing" the area to be finished. Use mop to apply a line of seal around the area to be sealed, then go back and fill in the "framed" area with a gentle side to side mopping motion, being certain to overlap each pass slightly. If a rectangular finish applicator is used, be certain, that the applicator head has been thoroughly rinsed. Apply seal in thin, unbroken line, be certain that each pass slightly overlaps the previous one.

Let each coat dry to the touch before recoating. Dry time is approximately 30 minutes. High humidity could prolong dry time. Allow the seal to set for 10 minutes before starting a fan. Do not use a fan in areas where dust could be blown onto seal. Apply each subsequent coat of JEWEL using the same method outlined above. The floor subject to burnishing operation, apply a minimum of four coats of JEWEL. Floors subject to spray buffing operations, apply a minimum of two coats of JEWEL.

MAINTENANCE: Dust mop daily - using dust mops treated with FIRST ATTRACTIONS. Dirt and dust can abrade and scratch your finishes destroying their natural luster. Damp mop regularly with EXCEL. The highest gloss comes only from clean floors. Dirt acts as a barrier to light reflection, causing your floors to look dull and lifeless.

To restore lost luster, burnish regularly. Mop on LUSTRE RESTORER before using Ultra High Speed (UHS) burnisher will bring back that spectacular "wet look" shine. To restore lost shine, spray buff at least twice per week. CRYSTAL IMAGE repairs marks, deep scuffs and scratches quickly. When used in a regular spray buffing program, it helps floor finishes to "snap back" to their original luster to extend finish life and eliminate time consuming recoating.

PROFESSIONAL SECRETS TO EFFECTIVE FLOOR CARE:
• To ensure JEWEL reaches its maximum gloss potential, always apply to floors with at least two coats of a floor seal, like FIRST REFLECTIONS. Maximum gloss can only be achieved on smooth, level floors. Floor sealers smooth out your floors surface imperfections to allow for maximum light reflectance.

• Do not use your stripping or rinsing mop or bucket for the application of floor finishes. Always start with a clean, previously wrung-out cotton/ rayon mop and bucket. Save this mop and bucket just for the application of finish.

• Always apply even, medium coats. To ensure the application of medium coats, wring out the bottom half of a fully saturated mop.

• Discard unused finish. Pouring unused finish from your bucket into the original container can spoil the good finish.

CAUTION
May irritate eyes. Do not take internally. Avoid contact with eyes. Prolonged or repeated contact with skin may cause irritation. Use with adequate ventilation. If in eyes, flush with cool water for at least 15 minutes, if irritation persists, obtain medical assistance. If swallowed, contact physician or poison control center immediately. Do not induce vomiting. If on skin, wash thoroughly with soap and water.
