- Polyethylene, Polypropylene and Steel Models Available
- One or Two Vacuum Motor Models Available

Rugged Dependability in Any Shape or Size

Eagle Power's wet/dry vacuum line means top-of-the-line quality and top-of-the-line value. All Eagle Power vacuums come complete with a 10-piece tool kit and dry filters.

Models are available in stainless steel and poly and feature capacities from 10 to 24 gallons.

These units are simple, rugged, built-to-last, and are ideal for wet or dry use. Most models can be equipped with a front mounted squeegee for maximum productivity.

The Eagle Power family of wet/dry vacuums features polyethylene, polypropylene or steel tanks, with fixed or tip'n pour style carts.

There is an Eagle Power wet/dry vacuum built to satisfy virtually any cleaning need. All Eagle Power vacuums feature self-locking hoses, oversized motors, and big wheels for transport.
